

Supreme AG™ is a product formulated with native minerals and other naturally occurring substances (used for millennia by cultures across the globe). It has been successfully applied as a mulch, soil amendment, fertilizer, natural pesticide, and natural herbicide. Iron-loving plants, acid-loving plants, trees, and shrubs will be nourished with key minerals and other ingredients. **Supreme AG™** produces incredible plant health, disease resistance, extreme weather tolerance, and bloom, as well as wonderful fruit production. Expect old plants to get rejuvenated.

When used with “Best Gardening Practices” and applied to Iron-loving and Acid-loving plants, **Supreme-AG™** consistently:

- Reduces or eliminates weeds and unwanted grass.
- Reduces or eliminates predatory insects and pests.
- Enhances plant growth in shorten time periods.
- Enhances bloom and fruit/nut production.
- Provides critical minerals and nourishment.
- Allows for hydration management with lower water requirements.
- Provides an eco-friendly and cost-effective alternative to synthetic fertilizers, herbicides, and pesticides.

Supreme AG™ uses sugarcane bagasse, but it is not unrefined bagasse. It is processed with natural minerals and substances that have been used for many years. This product can be used for mulch, soil amendment, fertilizer, and as a natural pesticide and herbicide. Studies at the **Supreme AG™** Test Farm have shown its effectiveness for plant health and growth.

Research is also being done at Southern University and Oak Ridge National Laboratories under the 2024 LA HRC-42 bill to support these findings. **Supreme AG™** is a processed formulation designed for effectiveness when used properly, and its results are evident in touch, smell, and application success.

To use, spread **Supreme AG™** as a mulch about ¾” around plants, trees, or shrubs without needing additional soil or fertilizer. It is available in 2200 lb. bales, 700 lb. supersaks, 5 gallon bags loose.
